Career Objective:

A passionate junior web developer with expertise in the MERN stack, eager to contribute to a dynamic team. I aim to enhance user experiences and solve complex problems, with a long-term goal of transitioning into Machine Learning.

Skills:

Frontend: React.js, HTML/CSS, JavaScript (ES6+), React Router DOM, State Management (useState, useEffect, Context API), Vite

Backend: Node.js, Express.js, MongoDB, Firebase, Stripe Integration, Role-Based Access Control

Tools: Git & GitHub, VSCode, Vite, Vercel

Projects:

Health Caduceus - MERN Stack Web App for Booking and Management (2024)

Key Features:

- Integrated secure payment processing using Stripe for transactions.
- Built a dynamic user interface with role-based access control using JWT and Context API.
- Implemented CRUD operations for booking, payments, and participant management through REST APIs.

Technologies: MongoDB, Express.js, React.js, Node.js, Stripe, REST APIs, JWT, React Router, Context API

Nurturing Energetics - Restaurant Management Website (2024)

Key Features:

- Developed e-commerce functionality for buying and selling food with user authentication and role-based access using JWT.
- Implemented React Helmet for SEO optimization and React Router for seamless navigation.
- Utilized Tanstack Query for real-time data fetching and state management.

Technologies: MongoDB, Express.js, React.js, Node.js, JWT, REST APIs, React Helmet, Tanstack Query, React Router

CraftVista - Art Sharing Platform (2024)

Key Features:

- Built an interactive platform for users to share, edit, and manage art with JWT-based authentication and authorization.
- Implemented full CRUD operations with REST APIs for seamless database interaction.
- Used React Router for smooth navigation and Context API for global state management.

Technologies: MongoDB, Express.js, React.js, Node.js, CRUD Operations, JWT, Context API, React Router, REST APIs
